

# HDMI Feed Through Connector

## MA015460

### OVERVIEW

MA015460 HDMI Feed Through Connector is a signaling interface for applications which require HDMI signals to be routed through a panel.

It is originally designed for RF-shielded test boxes. With its milled and coated aluminium casing it is a good choice for applications where RF isolation is required.

Delivered with an EMC shielding gasket for panel mounting.

MA015460 HDMI feed through connector is a HDMI Type-A to HDMI Type-A signaling interface.

Specific attenuation values (dB) - RF isolation, is verified by our customers in their applied setup.
