

RJ45 Feed Through Connector Block 2x2

MA016426

OVERVIEW

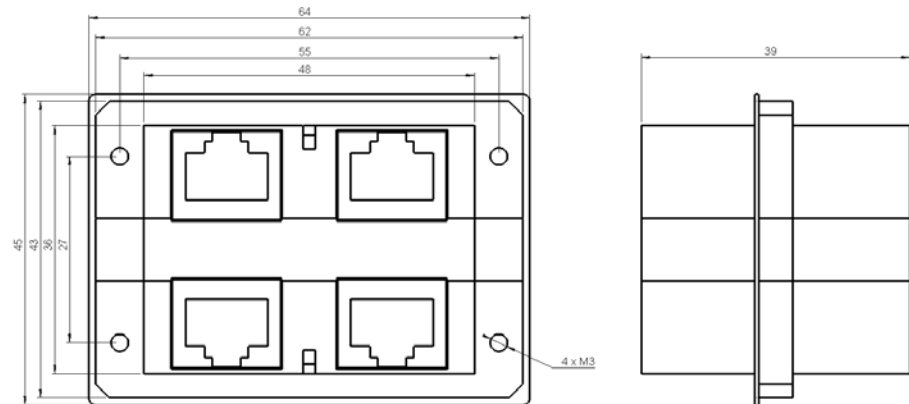

MA016426 RJ45 Feed Through Connector is a signaling interface for applications which require LAN signals to be routed through a panel. Consists of 4 individual feed thru connectors.

It is originally designed for RF-shielded test boxes. With it's milled and coated aluminium casing it is a good choice for applications where RF isolation is required.

Delivered with an EMC shielding gasket for panel mounting.

SPECIFICATIONS

Dimensions	L39*W64*H45 mm
Connector front	RJ45 jack
Connector back	RJ45 jack
Material	Coated aluminium

MA016426 RJ45 feed through connector is a block of four RJ45-Jack to RJ45-Jack signaling interfaces.

Specific attenuation values (dB) - RF isolation, is verified by our customers in their applied setup.
