

USB3 Feed Through Connector

MA090578

OVERVIEW

MA090578 USB3 Feed Through Connector is a signaling interface for applications which require USB signals to be routed through a panel.

It is originally designed for RF-shielded test boxes. With its milled aluminium casing it is a good choice for applications where RF isolation is required. Delivered with an EMC shielding gasket for panel mounting.

Integrated redriver circuitry helps maintain signal integrity.

SPECIFICATIONS

Dimensions	L56*W39*H27 mm
Connector front	USB3.0 Type B
Connector rear	USB3.0 Type A
Material	Aluminium
