

Float unit for 6P6C Test Connector

MA093536

OVERVIEW

MA093536 is a float unit for Bluelec 6P6C test plug.

It compensates the possible misalignments between test system mechanics and DUT socket and enables smoother insertion of the test plug.

Default position of floating part is '0' for all axes.
Displacement of Z is needed to allow displacement of X and Y.

SPECIFICATIONS

Displacement Zmax	+0.0 / -0,5 mm
Displacement Xmax@Zmax	+/- 0,3 mm
Displacement Ymax@Zmax	+/- 0,3 mm
Spring force F @ Z0	~10N
Spring force F @ Zmax	~14,5N
